Work Experience

Universidad Libre

July - January 2026

I developed two full-stack platforms using Next.js, Tailwind CSS, TypeScript, and Python. The first focused on enterprise database management, and the second on scheduling advisory sessions—both featuring modern, responsive interfaces designed for operational efficiency.

Hidroconsultora

2024 - 2025

Junior Developer – Developed a route optimization program in Python, implementing efficient algorithms to reduce transportation time and costs. Used libraries such as NetworkX, Pandas, and Geopy for data analysis and processing. Additionally, worked on integration with mapping APIs.

Technologies

Academic Background

Universidad Libre de Pereira

2021 - 2025

Systems Engineer graduated from Universidad Libre de Pereira, with strong technical expertise in software development and high-performance web application design.

Certifications

- 2025 | Cybersecurity Bootcamp Explorer Certification - Talento Tech, Universities of Caldas and Antioquia
- 2024 | SQL Basic Certification - HackerRank
- 2024 | SQL Intermediate Certification - HackerRank
- 2024 | Cybersecurity, Threats, Vulnerabilities and Attacks Achievement - Cisco
- 2024 | Network Security Achievement - Cisco
