

Nicolas Castaño Delgado

Systems Engineer

Software Developer

Pereira, Colombia • nicoj3000its@gmail.com • github.com/nicoj3000

Professional Profile

Software engineer focused on Fullstack development and cybersecurity, oriented toward building scalable and secure digital solutions that optimize processes and improve operational efficiency. Continuously evolving technically, with the ability to take on complex challenges and generate real impact in business environments.

PROFESSIONAL EXPERIENCE

FH Vélez Abogados – Pereira, Risaralda

IT Director / Software Engineer | January 2026 – Present

I lead the technology strategy and execution, driving digital transformation initiatives aimed at improving operational efficiency.

PROFESSIONAL EXPERIENCE

FH Vélez Abogados – Pereira, Risaralda

IT Director / Software Engineer | January 2026 – Present

I lead the technology strategy and execution, driving digital transformation initiatives aimed at improving operational efficiency.

PROFESSIONAL EXPERIENCE

FH Vélez Abogados – Pereira, Risaralda

IT Director / Software Engineer | January 2026 – Present

- I lead the technology strategy and execution, driving digital transformation initiatives aimed at improving operational efficiency.
- I coordinate development projects, optimize internal processes, and implement scalable technology solutions aligned with business objectives.

Hidroconsultora

Fullstack Developer | 2024 – 2025

- Designed and developed web solutions and systems focused on process optimization.
- Built a route optimization system in Python, reducing transportation times and operational costs.
- Implemented graph-based algorithms using NetworkX to improve route planning efficiency.
- Processed and analyzed data with Pandas to support decision-making.
- Integrated geolocation services and map APIs using Geopy for distance calculations.

Featured Academic Project

Project Dashboard – Scalable Multi-Tenant SaaS Platform

Final Degree Project | 2024 – 2025 | github.com/Nicoj3000/Project-Dashboard

- Led the design and development of a scalable multi-tenant SaaS platform with React, TypeScript, and Tailwind CSS, adaptable to any type of company with configurable modules.
- Implemented a complete admin panel with user, role, and permission management using Clerk for authentication and secure per-tenant access control.
- Designed the data layer with PostgreSQL and Prisma ORM, ensuring efficient queries and a multi-tenant architecture with isolated environments per organization.
- Built the interface with accessible Shadcn UI components and integrated file and media management via Uploadthing.

Technical Skills

- Programming Languages: JavaScript (ES6+), Python, Java, PHP, HTML5, CSS3
- Frameworks & Libraries: React, Vue.js, FastAPI, Next.js, Tailwind CSS, Bootstrap, GSAP, Radix UI, ArcGIS Core, NetworkX
- Databases: PostgreSQL, MySQL, Supabase
- Tools & Technologies: Git, GitHub Actions, Postman, JWT, Vite, Heroku, Pandas, Geopy, Arduino
- Areas of Expertise: Fullstack Development, Cybersecurity, Process Optimization
- Languages: Native Spanish, English B2

Education

UNIVERSIDAD LIBRE DE PEREIRA | Pereira, CO

Systems Engineering | 2021 – 2025

Specialized in fullstack development and scalable web application architecture.

Certifications

- 2025 | Cybersecurity Bootcamp – Talento Tech, Universities of Caldas and Antioquia
- 2024 | SQL Basic – HackerRank
- 2024 | SQL Intermediate – HackerRank
- 2024 | Cybersecurity: Threats, Vulnerabilities and Attacks – Cisco
- 2024 | Network Security – Cisco
